Salus Training Process Safety Awareness Course

Build a shared baseline across your team,
in 90 minutes.

Our online Process Safety Awareness course gives every person on a high-hazard site the same starting point: a clear, practical understanding of what process safety is, why major accidents happen and what everyone can do to prevent them.

It covers the fundamentals: identifying and managing risk, learning from incidents and understanding what good process safety leadership looks like.

- ✓ 90 minutes online, completed at your own pace
- ✓ 4 modules covering the fundamentals of process safety
- ✓ Gain a shared understanding of risk and your role in preventing a major accident
- ✓ Accredited by IChemE and endorsed by Step Change in Safety
- ✓ Aligned with OEUK Process Safety Principles and IOGP Process Safety Fundamentals

Who It's For

Anyone working in or around high-hazard industries, whatever their role.

NEW COURSE

Operational Decision-Making in Process Safety

Turn process safety awareness into action
in the moments that matter most.

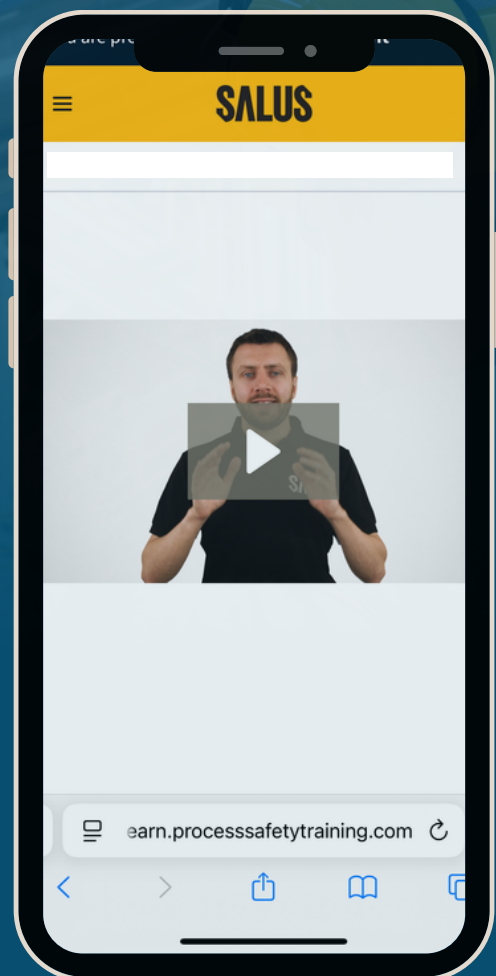

Our online Operational Decision-Making course bridges the gap between Process Safety Awareness and Process Safety Leadership.

It focuses on how major accidents develop during everyday operations, and how people at all levels can recognise rising risk, test assumptions and intervene early.

- ✓ 90 minutes online, completed at your own pace
- ✓ 10 modules covering how major accidents develop during normal, everyday work
- ✓ Learn how to spot, stop and escalate risk concerns clearly, early and professionally

Who It's For

Safety decision-makers who want the skills to recognise when work is heading into danger, stop it cleanly and escalate with confidence.

NEW COURSE

Controlling Major Accident Hazards on the UKCS

Know the law.

Be ready for inspection.

UKCS operators are facing more scrutiny than ever — ageing assets, leaner teams and sustained HSE inspection campaigns that have consistently identified the same gaps in workforce understanding.

Our online Controlling Major Accident Hazards on the UKCS course closes those gaps. It's a practical, plain-language guide to UK offshore safety law: what the key regulations require, how HSE assesses compliance and what inspectors expect to see.

Who It's For

Anyone working on a UKCS installation who wants to understand the regulatory framework they're operating within, and be ready when inspectors arrive.

2 hours online, completed at your own pace

4 modules covering the full UK offshore regulatory framework, from legal duties to inspection readiness

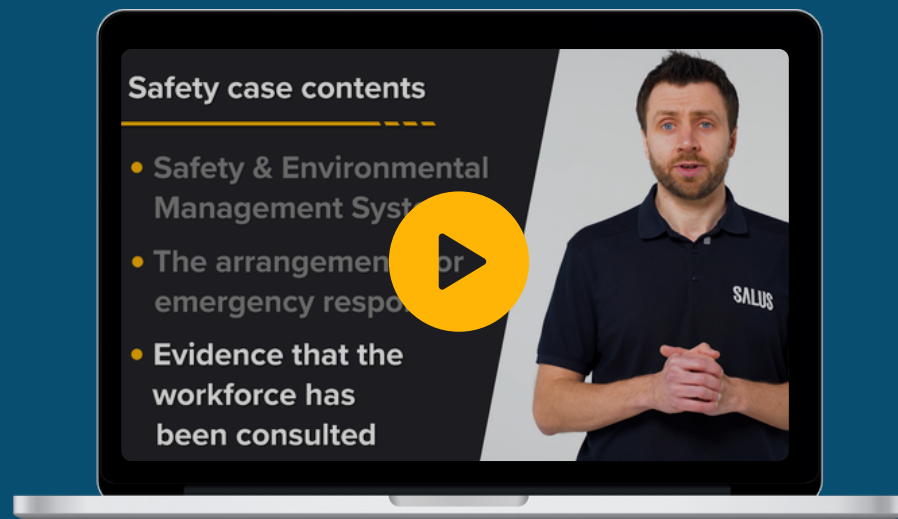

Gain clear, actionable guidance that can be applied immediately in operational settings

Why Our Courses Work

These courses build a shared language around risk. After completing any course in the suite, your people will be confident to have better conversations about what could go wrong, what the rules require and what to do about it.

That shift happens at every level, from the worksite to the boardroom.

"The Salus process safety CBT is a fantastic addition to our training resources, providing a comprehensive and interactive learning experience for our workforce. Ultimately fostering a culture of safety within our organisation which empowers our workforce to prioritise process safety in everything that we do."

MOIRA LAMB
Health and Safety Manager, Apache

We have rolled out the Salus Technical Process Safety Awareness training throughout our organisation. The training has been well received by people at all levels. The short video format provides a clear and accessible approach to explaining this critical topic to a wide range of people and forms a key part of our drive to engage everyone in the organisation in supporting Process Safety Performance.

ANDREW SEKULIN
Integrity and Process Safety Assurance
Manager, Serica

We are incredibly thrilled with the results that the Salus Technical Process Safety Awareness course has produced! It has proven to be an invaluable asset in enhancing our team's understanding of process safety in our drilling and well operations. Our team members are now equipped with the knowledge and expertise to confidently identify and manage process safety risks associated with our operations. We couldn't be more thrilled with the outcomes of this course!

ANDY ROBB
Lead HSE Advisor (D&W), Neptune
